

ArcadeIT! - Power unit

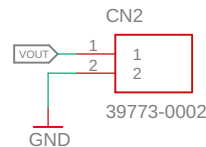

5V, 3.3V, VDD + GND

This takes from 6V to 9V and gives 3.3 and 5V.

The power supply plugged to this unit must comply with the standard EN-60950-1: 2006+A11/2009, and must be Safety Extra Low Voltage (SELV) with limited power capability.

Maximum current allowed is 800mA, so if any expansion is used with the ArcadeIT! board make sure that the overall current used stays within this limit. Where needed an add on supply voltage must be used to powerup external expansion.
