

ArcadeIT! - Memory module

3.3V+ GND
2MB

This circuit is an SRAM memory expansion that can be used together with ArcadeIT! mainboard or with other embedded systems that can handle the signals used by this module.

The optional connector CN3 can be soldered to use this module with other systems.

On this board can be soldered 1, 2 or 4 512KB memory chips. They are selected by the multiplexer that acts as memory mapoper.

There are also LED indicators that are light up when the corresponding chip is in use.
